

Medical Robotics CS4270 - Assignment Submission

Summer 2026

Exercise Sheet 8

Group 8

Donuru Umakanth Reddy (802457), Alina Khan (819206), Chang Quoc

Toan (810588)

Please upload your solutions via the submission activity in the Medical Robotics Moodle course. Submissions must include the names of all group members and be uploaded as a .pdf file.

1. Motion Correlation I

1.1. 1.A

Figure 1: Patient positions plotted over time.

1.2. 1.B - 1.D

Figure 2: Comparison of MULIN prediction models against ground truth.

1.3. 1.E

Console Output:

RMSE for MULIN0: 0.00176229

RMSE for MULIN1: 0.00008806

RMSE for MULIN2: 0.00176230

Observing the RMSE values, it is clear that the MULIN order 1 is the best for the following case.

2. Least Mean Squares

2.1. 2.A

Derivations

Exercise 7

Exercise 8

Derivations

Inclass sheet

we know that

$$e_n = y_n - \hat{y}_n$$

$$\hat{y}_{n+1} = w_n y_n$$

$$w_{n+1} = w_n + e_n y_n$$

given

$$K=1 \quad y_0 = \frac{\sqrt{2}}{2} \quad y_1 = 1 \quad y_2 = \frac{\sqrt{2}}{2} \quad y_3 = 0$$

let's assume $w_0 = 0$

$\therefore$ At time step $n=0$

$$\hat{y}_1 = w_0 y_0 = 0 \times \frac{\sqrt{2}}{2} = 0$$

$$\therefore e_0 = y_0 - \hat{y}_1$$

$$\therefore e = \frac{\sqrt{2}}{2}$$

$$w_1 = w_0 + e_0 y_0$$

$$\therefore w = 0.5$$

For $n=1$

$$\hat{y}_2 = w_1 y_1 = 0.5 \times 1 = 0.5$$

$$e_1 = y_1 - \hat{y}_1 = 1 - 0.5 = 0.5$$

$$\therefore w_2 = w_1 + e_1 y_1 = 0.5 + (1 \times 1) = 1.5$$

for $n=2$

$$\hat{y}_3 = w_2 y_2 = 1.5 \times \frac{\sqrt{2}}{2} = \frac{3\sqrt{2}}{4}$$

$$e_2 = y_2 - \hat{y}_1 = \frac{\sqrt{2}}{2} - 0.5 = \frac{\sqrt{2}-1}{2}$$

$$w_3 = w_2 + e_2 y_2 = 1.5 + \left(\frac{\sqrt{2}-1}{2} \right) \left(\frac{\sqrt{2}}{2} \right)$$

$$= 2 - \frac{\sqrt{2}}{4}$$

For $n=3$

$$\hat{y}_4 = w_3 y_3$$

$$\therefore y_3 = 0$$

$$\therefore \hat{y}_4 = w_3 \times 0 = 0$$

$$\therefore \underline{\underline{\hat{y}_4 = 0}}$$

Figure 3: Calculation of $\hat{y}_4$ using the LMS algorithm.

2.2. 2.B

Figure 4: All the Plots wrt y , M and μ .

2.3. 2.C

===== LMS RESULTS =====

M	mu	RMS
2	0.0001	0.066892
2	0.0002	0.066931
2	0.0010	0.061117
4	0.0001	0.066981
4	0.0002	0.065891
4	0.0010	0.055339
8	0.0001	0.065843
8	0.0002	0.062422
8	0.0010	0.050442

BEST: M=8, mu=0.0010, RMS=0.050442

=====

As the console output shows the value of RMSE decreases as the value of M and μ increases, This is due to the algorithm having access to more data points.
